Ergonomic hand grips

Extendable lifting arm

Lower leg support

ISA

Invacare Stand Assist

- **Ergonomic hand grips:** fits the natural shape of the hand and wrist.
- **Extendable lifting arm:** different length settings to suit various body shapes and heights and maximise ergonomics for an active transfer.
- **Lower leg support:** a wide range of settings to comfortably fit many different leg lengths.
- **Foot plate:** optional footplate heights for further adaptation of the base to accommodate different body heights.
- **Push bar:** shape and dimension based on an average elbow height and shoulder width.
- **Foot pedal:** with anti-slip material and large surface, plus an optional hand lever for easy manual leg opening.

The Invacare ISA stand assist lifter is designed to support active transfers for people who have some weight bearing ability, but are unable to raise themselves into a standing position unaided.

A focus on flexible adjustment enables the ISA to achieve a natural pattern of movement. By adapting to the needs of a wider range of body types, this innovative stand assist can be adjusted to each individual without compromising on the ergonomic function of the lift.

Hook Design

Ergonomic push bar

Curved Boom and Spreader Bar

Status Indicator on Control Box

Birdie EVO

Invacare Lifting Hoist

- **Curved Design of Boom and Spreader Bar:** Distinct design allows carers to maintain eye contact with clients throughout a transfer.
- **Hook Design:** Securely attach slings with one hand thanks to a new user-friendly hook design.
- **Battery Status Indicator:** Delivers peace of mind regarding the remaining lifts that are achievable.
- **Ergonomic Push Bar:** Ergonomic design of the push bar makes handling and manoeuvring easier.
- **Curved Leg Design:** Provides a cocoon like feeling and enables easy movement around objects.

The new Birdie EVO has been designed to offer a high feature-set of options that have been blended with new technologies to provide maximum comfort and security when lifting or transferring a patient to or from a bed, chair or even the floor.

Based on the renowned Birdie, the new range has been customer insight led, encompassing everything that was valued on the Birdie whilst bringing in new features to further enhance the client and carer experience.
