SAFE HANDLING:

Always wear Personal Protective Equipment (PPE) when handling, dispensing and using chemicals.

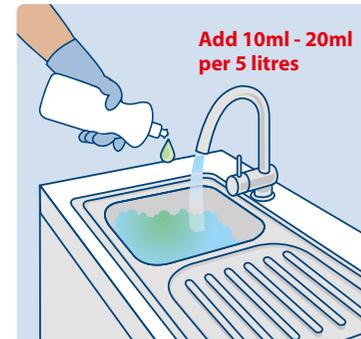

Refer to the Safety Data Sheet (SDS) for detailed information and immediate first aid measures including medical emergency helpline number.

1
Use appropriate PPE as indicated in the safety data sheet.

2
Dispenser: Fill sink with hot water and add 1 dose per 5 litres of water.

3
Bottle: Fill sink with hot water and add 10ml - 20ml per 5 litres of hot water depending on soiling level.

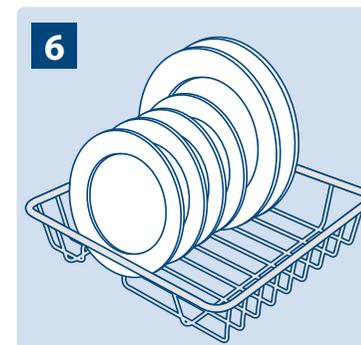

Remove any loose food debris and soiling before being washed.

4
Immerse items for 5 minutes. Agitate with a cloth, brush or scouring pad as required.

5
Rinse thoroughly with clean water.

6
Allow to air dry.
